

COURSE: Personal Business Intelligence with Microsoft Power BI

SQL Master Academy works in close partnership with SolidQ in the field of Business Intelligence trainings, due to which fact we also have in our portfolio a unique programme of professional trainings in the field of Data Quality, Multidimensional Design, SSAS, ETL and SSIS. The courses train BI developers and designers of BI solutions, including back end EIM, as well as front end and reporting.

Summary

<i>Duration:</i>	<i>2 days/ 16 hours</i>
<i>Level:</i>	<i>200*</i>
<i>Delivery method:</i>	<i>In class</i>
<i>Language:</i>	<i>English</i>
<i>Price:</i>	<i>550 EUR excl VAT</i>

** The difficulty level is consistent with the widely accepted scale of technical difficulty of training on Microsoft Corp*

AUDIENCE:

The focus of the training is to train analysts, advanced Office and other BI end users to develop their own Bi applications. Attendees should have basic understanding of data sources and data analysis. The attendees should be familiar with Microsoft Excel.

DESCRIPTION:

In a modern business intelligence solution, advances analytics is available also on the personal level. With components of Microsoft Power BI, a lot of power from the server side is now inside Excel or offered as a cloud service. On-premise tools covered in this course include Power Pivot, Excel built-in Pivot Tables and Pivot Graphs for analyzing Power Pivot models, ad-hoc reporting tools for simple, geographical and temporal reports, namely Power View and Power Map, and Power Query as the data acquisition and transformation tool. The Office 365 part introduces personal Power BI Service that enables you to define personal cloud dashboards, use natural language queries with Power Q&A, and create Power BI Mobile applications. Finally, Power BI Desktop allows you to develop dashboard on premise and deploy them in cloud.

AFTER THE TRAINING ATTENDEES WILL BE ABLE TO:

- Use the Power BI components to discover and transform the data
- Create dimensional models, analyze them with built-in Excel capabilities and with additional reporting tools
- Create personal dashboards, and more.

TOPICS:

- Module 1. Introduction to Business Intelligence
- Module 2. Building a Power Pivot Model
- Module 3. Power Pivot Model: Advanced Features
- Module 4. Analyzing Power Pivot Models
- Module 5. Power Pivot Models Reporting and Geo-Temporal Analysis
- Module 6. Data Acquisition and Transformation with Power Query
- Module 7. Power BI Service
- Module 8. Power BI Desktop

FUNDAMENTALS

SQL Server Fundamentals courses give you an excellent base for successful career as administrator or data base developer. Their practical purpose, use of scenarios of working practice will help both the beginners, as well as the more experienced students. The courses will assist the students to develop skills to protect in a better way the data of their organizations, to react quicker and adequate to all issues, which are data base related, and to avoid following some harmful myths and wrong concepts in administration and data base development.

- ❖ **Querying SQL Server Fundamentals**
- ❖ **SQL Server Administration Fundamentals**
- ❖ **SQL Server Development Fundamentals**

MASTERING

The trainings of SQL Server Mastering series consist of intensive modules which are comparatively complicated regarding the technical level and which are designed and intended for professionals in the field of SQL Server. Trainings include solid theoretical material, part of which comes directly from the program team, who develops SQL Server in Microsoft also numerous demonstrations from the "workshop" of SQL Server, unpublished tuning techniques for increase of SQL Server performance.

- ❖ **Mastering SQL Server for Database Admins**
- ❖ **Mastering SQL Server for Database Developers**
- ❖ **SQL Server Performance Tuning and Optimization**

DEEP DIVE

Deep Dive Series consists two and three day trainings with technical level 300+ (level 100 – beginners, level 400 – masters). Those courses are focused on specific components of SQL Server. They consist of a significant number of practical advices, a lot of demonstrations, huge theoretical part and also examples of real infrastructural solutions, discussions of real situations which students have in their infrastructures and want to discuss.

- ❖ **SQL Server Enterprise Infrastructure Optimization and Deployment**
- ❖ **SQL Server Upgrade**
- ❖ **SQL Server Replication Deep Dive**
- ❖ **SQL Server High Availability and Disaster Recovery Solutions**

BI

SQL Master Academy works in close partnership with SolidQ in the field of Business Intelligence trainings, due to which fact we have in our portfolio a unique programme of professional trainings in the field of Data Quality, Multidimensional Design, SSAS, ETL and SSIS. The courses train BI developers and designers of BI solutions, including back end EIM, as well as front end and reporting.

- ❖ **Introduction to MS Business Intelligence**
- ❖ **BI Fundamentals**
- ❖ **Accelerated SQL Server 2012-2016 Integration Services**
- ❖ **Multidimensional Database Design with SSAS 2012-2016**
- ❖ **Data Quality and Master Data Management with SQL Server 2012-2016**
- ❖ **Data Mining Algorithms in SSAS, Excel, R, and Azure ML**

DATABASE DESIGN

The design of relational data base is one important and inseparable part of the solution development. Those are knowledge and skills which every DB Dev or DB Designer should have. A huge part of the problems in production sphere are due to a not good base model or to such, which does not scale well. The courses for design of relational data base we offer in SQL Master Academy, are oriented not only to mastering of the relational model and the good design of the subject filed, but also to the mastering of good practices in modelling of scalable data base.
